SOBRE A HISTÓRIA
DOS NÚMEROS ROMANOS!

Os números Romanos ou Numeros Romanos Surgiram
na Roma antiga, há 2200 anos, como uma forma de
identificação simples. Sua criação veio da necessidade
de contar um sistema numérico, para contabilizar
tributos, saldos, entre outros, eles então usaram
as próprias letras do alfabeto.

história das olimpíadas

O primeiro esporte, até a década Terceira Competição, era a corrida. No quinto século antes de Cristo, já eram dez modalidades. As primeiras disputadas: corrida, salto em distância, lançamento do dardo, Pentatlo, arremesso de disco, Pancrácio, Boxe, luta livre de legas e corrida de cavalo.

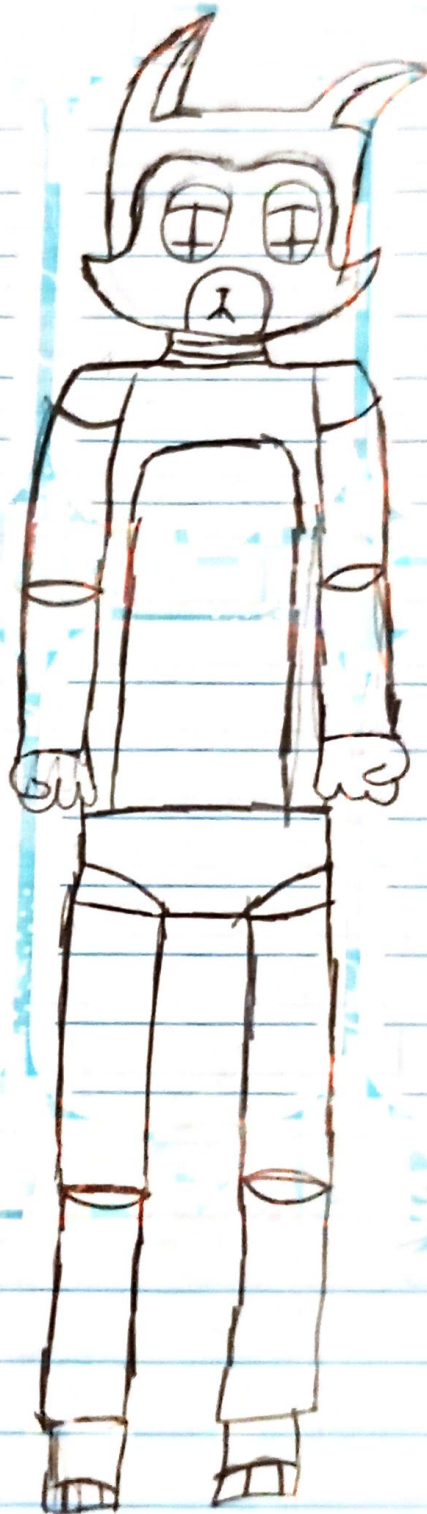

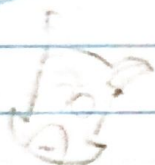

Os primeiros jogos olímpicos da era moderna foram realizados em Atenas em 1896, os 285 atletas de 13 países disputaram Provas de atletismo, esgrima, luta livre, ginástica, halterofilismo e ciclismo, natação e tênis.

Com frequência o termo Olimpíada é usado para nomear o evento dos jogos olímpicos. Tecnicamente, Olimpíadas compreendem o período de quatro anos compreendido entre uma edição e outra dos jogos olímpicos.
